

How does GPA work?

GPA stands for grade point average. It is a number that sums up how well you performed in all of your classes.

Example

Science → C → 2

Mathematics → C → 2

English → B → 3

History → C → 2

PE → A → 4

Art → A → 4

To calculate your GPA:

$$(2+2+3+4+4) \div 5 = 3.2$$

Your GPA is 3.2
